均衡飲食 Balanced Diet

現今的飲食習慣導致人們的膳食含有過高脂肪，而膳食纖維卻偏低。如過量吸收脂肪，但消耗不夠，脂肪便會積聚在身體內，導致肥胖及引起其他慢性疾病，例如糖尿病、高血壓及心臟病。The diet of most people nowadays contains too much fat but too little dietary fibre. Excessive intake of fat without adequate exercise results in accumulation of fat in the body, which leads to obesity and chronic illnesses such as diabetes, hypertension and heart disease.
